

ALI ARSALAN

Software Engineer

ABOUT ME

AI-native product builder and software engineer experienced in taking SaaS products from concept and requirements through development, deployment, customer onboarding, and iteration. Currently managing a paid research database and building APRO, a multi-product SaaS platform. Skilled in AI workflows, RAG, automation, rapid prototyping, and full-stack product development.

EDUCATION

Capital University of Science & Technology

Bachelor of Software Engineering

2022 - 2026

SKILLS

- Programming: Python, JavaScript, Java, C++, C#, C
- Frontend: React.js, Next.js, HTML, CSS, Tailwind CSS
- Backend: Node.js, Express.js, REST APIs
- Database: MySQL, PostgreSQL (Supabase), SQLite
- Cloud & Tools: Git, Supabase, Postman, WordPress
- AI & Product: ChatGPT, Claude, Codex, RAG, Rapid Prototyping

EXPERIENCE

Pak Institute of Peace Studies (PIPS)

IT HEAD - DIGITAL PRODUCTS & PLATFORMS

NOV 2025 – PRESENT

- Lead the development, deployment, and operation of organizational websites, databases, internal tools, and digital products.
- Manage a paid research database, handling customer communication, onboarding, account provisioning, access management, and ongoing support.
- Work with users, researchers, and leadership to identify problems, gather requirements, and translate them into practical product solutions.
- Resolve production issues across applications, databases, hosting, DNS, deployments, and third-party integrations.

APRO

IT HEAD - PRODUCT & PLATFORM DEVELOPMENT

JAN 2026 – PRESENT

- Lead the technical development of a multi-product SaaS ecosystem combining software applications, organizational tools, developer services, and cloud platforms.
- Own product planning, user flows, architecture, development, deployment, launch strategy, and iteration.
- Developed web and desktop experiences covering authentication, role-based access, application distribution, installation, launch, and management.
- Use ChatGPT, Claude, Codex, and other AI tools for research, documentation, prototyping, development, debugging, and product decisions.

AI-Powered RFP Analysis Platform

AI PRODUCT BUILDER – HACKATHON PROJECT

JUNE 2026

- Built an AI product that extracts structured requirements from complex RFP documents and generates proposal drafts.
- Integrated OCR, RAG, local and cloud language models, structured JSON generation, and GO/NO-GO analysis.
- Took the product from problem analysis to working prototype, testing, refinement, and demonstration within three days.
